LANGUAGE

- Hindi
- English
- Japenese

PROJECTS

Creating AWS Infrastructure with infrastructure as a Code using Terraform

2022 - 2023

Tools :-

- Terraform, Amazon web services(EC2 and S3).

Description :-

- In this project, I created an EC2 instance without using any amazon console login and also created one S3 bucket.
- I used programming language to write code and also used terraform blocks to create a .tf file.
- Connected to amazon account with the help of private & Public keys.

Kubenetes End to End deployment

2022 - 2023

Tools :-

- Kubernetes, MiniKube, Amazon web services(EC2 and S3).

Description :-

- Built Kubernetes Cluster on AWS from scratch with MiniKube
- Setup and Managed Docker Containers for Django and React
- Application into Kubernetes Pods Managed Deployment, Replication, Auto healing, Auto scaling for Kubernetes Cluster. Managed Network and Services with Host IP allocation through
- Proxy on AWS EC2 and Route53
